

2009 Burlington Mayoral Race

This is real voting data from a 2009 Mayoral Election in Burlington. It's noteworthy because Burlington uses IRV to decide the winner of their election. There were three candidates with a significant number of votes:

Montroll (Democrat)

Kiss (Republican)

Wright (Progressive)

Voter Data	
Number of Voters	Voter Preferences
1332	M>K>W
767	M>W>K
455	M
2043	K>M>W
371	K>W>M
568	K
1513	W>M>K
495	W>K>M
1289	W

How do the candidates fare (1st, 2nd, 3rd place) under each of the following voting methods?

- IRV
- Plurality
- Condorcet
- Borda Count
- Method of your Choice

What do you make of these discrepancies?
