Accessing the Technology

AAHOM & MNH

Kimberly A. Brink - January 17, 2016

Ann Arbor Hands-On Museum:
The technology is located in the Living Lab safe in the storage closet.

**Opening the Safe**
1. Input the code and then press the “B” button, the green light will turn on.
2. Turn the knob clockwise within 5 seconds to open the door.
3. Each key pressed will be accompanied by a buzzer and a yellow flashing light. If the entered code is invalid the yellow light will flash and the buzzer will quickly sound; this indicates that the code needs to be re-entered.
   **CAUTION:** Entering an incorrect code 3 times will lock the system for 20 seconds.

**Closing the Safe**
1. Turn the knob counter-clockwise, the mechanism will automatically lock the safe.

Museum of Natural History:
The technology is located in a locker in the Docent Room. The locker is labeled and is the lower left-most locker.

**Opening the lock**
1. Input the code
2. Squeeze the shackle into the lock.
3. The lock will pop open.

**Closing the lock**
1. Change the input on the lock so that it is not showing the cod.
2. Close the lock.
