Problem of the Day 09
Section 3.2
Question 3.07

There are many different acids and bases in the five parts of this question. From among the structures that are already drawn, select an acid and a base from different parts of the question (e.g., an acid from part a, a base from part c) and find a combination that you are confident will have a $K_{eq} > 1$. Defend your rationale.
